When hosting an Olympic Games, a country has to take account of several considerations, among which the financial one is by far the most important. The costs of hosting the Olympics can (23) _____ tens of billions of dollars, and it is commonplace for budgets to double or even triple. In addition to the direct costs of hosting the Games (the opening and closing ceremonies, athletes' village, security, etc.), cities often must build expensive new venues (24) _____ lesser-known sports. Once constructed, sports venues often incur additional maintenance costs long after the Games have ended.

While costs are the (25) _____ concern for a host city, there are other factors to consider. For one, an Olympic host city may receive substantial revenue from ticket sales, tourist spending, corporate sponsorship, and television rights. Cities such as Los Angeles (1984) and Seoul (1988) actually made a large profit from the Games they hosted. (26) _____, hosting the Olympic Games confers prestige on a host city and country, which can lead to increased trade and tourism. The Olympics are also an opportunity to invest in projects (27) _____ improve the city's quality of life, such as new transportation systems.

Body language is a vital form of communication. In fact, it is believed that the various forms of body language contribute about 70 percent to our comprehension. It is important to note, however, that body language varies in different cultures. Take for example, eye movement. In the USA a child is expected to look directly at a parent or teacher who is scolding him/her. In other cultures the opposite is true. Looking directly at a teacher or parent in such a situation is considered a sign of disrespect.

Another form of body language that is used differently, depending on the culture, is distance. In North America people don't generally stand as close to each other as in South America. Two North Americans who don't know each other well will keep a distance of four feet between them, whereas South Americans in the same situation will stand two to three feet apart. North Americans will stand closer than two feet apart only if they are having a confidential conversation or if there is intimacy between them.

Gestures are often used to communicate. We point a finger, raise an eyebrow, wave an arm – or move any other part of the body – to show what we want to say. However, this does not mean that people all over the world use the same gestures to express the same meanings. Very often we find that the same gestures can communicate different meanings, depending on the country. An example of a gesture that could be **misinterpreted** is sticking out the tongue. In many cultures it is a sign of making a mistake, but in some places **it** communicates ridicule.

The dangers of misunderstanding one another are great. Obviously, it is not enough to learn the language of another culture. You must also learn its non-verbal signals if you want to communicate successfully.

- D. misspelled

Question 32: The word "**it**" in paragraph 3 refers to _____.

- A. making a mistake
- B. an example
- C. the country
- D. sticking out the tongue

Question 33: As stated in the passage, in order to communicate successfully with people from another culture, it is advisable for a person _____.

- A. to learn both the language and non-verbal signals of that culture
- B. to use the body language of the people from that culture
- C. to learn only non-verbal signals of that culture
- D. to travel to as many countries as possible

Question 34: Which form of body language is NOT mentioned in the passage?

- A. distance
- B. gesture
- C. posture
- D. eye movement

Read the following passage and mark the letter A, B, C, or D on your answer sheet to indicate the correct answer to each of the questions from 35 to 42.

The green building movement, started in the 1970s as a way to reduce environmental destruction, is changing the way buildings are constructed. In the early years, green builders were a small minority, and their goals of reducing the environmental impact of buildings were considered unrealistic. Now, however, the movement is growing, as builders have been able to take advantage of new technology.

Green builders try to make use of recycled materials, which means less waste in dumps. Also, they reduce environmental impact by reducing the energy requirements of a building. One way is to provide an alternative, non-polluting source of energy. First, with solar panels, it is possible to produce electricity from the rays of the sun. Once installed, **they** provide energy at no cost and with no pollution.

Another solution is to reduce the amount of energy required in a building. It is possible to cut electricity use noticeably by improving natural lighting and installing low-energy light bulbs. To reduce the amount of fuel needed for heating or cooling, builders also add **insulation** to the walls so that the building stays warmer in winter and cooler in summer.

One example of this advanced design is the Genzyme Center of Cambridge, the most environmentally responsible office building in America. Every aspect of the design and building had to consider two things: the need for a safe and pleasant workplace for employees and the need to lessen the negative environmental impact. 75 percent of the building materials were recycled materials, and the energy use has been reduced by 43 percent and water use by 32 percent, compared with other buildings of the same size.

In other parts of the world, several large-scale projects have recently been developed according to green building principles. One of these is in Vauban, Germany, in an area that was once the site of army housing. The site has been completely rebuilt with houses requiring 30 percent less energy than conventional ones. These houses, heated by special non-polluting systems, are also equipped with solar panels.

A larger project is **under way** in China. The first phase of this project will include houses for 400 families built with solar power, non-polluting bricks, and recycled wall insulation. In a second phase, entire neighborhoods in six cities will be built. If all goes well, the Chinese government plans to copy these ideas in new neighborhoods across China.

Green building ideas, on a small or large scale, are spreading. Individuals, companies, and governments are beginning to see their benefits. Not only are they environmentally friendly, green buildings improve living and working conditions and also save money in the long run.

Question 35: Which of the following does the passage mainly discuss?

- A. An environmentally friendly approach to constructing buildings
- B. New technologies applied to constructing office buildings
- C. Economic benefits of environmentally responsible buildings
- D. Successful green building projects all over the world

Question 36: According to paragraph 1, the environmental goals set by green builders were initially considered unrealistic presumably because _____.

- A. there was an abundance of natural materials for the construction of conventional buildings
- B. the problems of environment destruction were not prevalent at the time
- C. the potential applications of technology to constructing green buildings were not recognised then
- D. there was a lack of green builders at the beginning of the 20th century

Question 37: The word "**they**" in paragraph 2 refers to _____.

- A. rays of the sun
- B. solar panels
- C. recycled materials
- D. green builders

Question 38: The word "**insulation**" in paragraph 3 mostly means _____.

- A. panels that convert solar energy into electricity
- B. devices that monitor changes in temperature
- C. materials that prevent heat loss and absorption
- D. systems that protect buildings from the sun's rays

Question 39: What is one common characteristic shared by the Genzyme Center of Cambridge and the project in Vauban, Germany?

- A. Both were built out of entirely recycled materials instead of conventional ones.
- B. Both were built based on green building principles, which reduces energy use considerably.
- C. Both are housing complexes with special, non-polluting heating systems.
- D. Both took advantage of new insulation technology, which cuts down on construction costs.

Question 40: The phrase "**under way**" in paragraph 6 mostly means _____.

- A. being notified
- B. being certified
- C. being launched
- D. being inspected

Question 41: Which of the following is NOT mentioned in paragraph 7 as a merit of green buildings?

- A. Being friendly to the environment
- B. Increasing work productivity
- C. Proving more economical eventually
- D. Improving living conditions

Question 42: According to the passage, which of the following statements about green buildings is TRUE?

- A. They are more economical and produce no pollution.
- B. They are environmentally responsible constructions with gardens.
- C. They have only been built in technologically developed countries.
- D. They are gaining in popularity in different parts of the world.
